

CHAP | Website Design Breakdown | March 2019

THISISFST.COM

Update

Overview

Following approval of proposed wireframes, we have completed the initial design stage for the CHAP website. Page styling has taken steer from the CHAP guidelines, introducing the refreshed colour palette, typeface and wave graphic.

This document provides annotated breakdowns of each page, outlining structure and functionality. Please note, all photography and written titles have been introduced for palce-holder purposes only to create the overall template. Once signed off, we can begin to apply these templates to the existing content and introduce relevant photography throughout.
